Jesse Colombo @TheBubbleBubble · 21h

This gold chart courtesy Jesse Colombo features a large triangle pattern that can be expected to break out on the upside with a target at \$5,200.

This chart courtesy Thedailygold.com compares the current gold bull market (dark brown), to 2 earlier bulls. In the event that we follow the 2 previous bull markets, we should soon expect a few months of sideways action.

This chart shows gold breaking out against Bitcoin. In our weekend report of 11/21 we showed a short-term chart for Gold:Bitcoin which shows gold outperforming since August.

Featured is the daily gold chart. Price is breaking out from a large triangle. A close above the green arrow will provide confirmation. The first target is at the brown arrow. The number of ounces backing GLD is unchanged at 33.6 million. The GDI closed at 100%.

Featured is the weekly gold chart. The green arrows point to bottoms in the 7 - 8 week gold cycle, the brown arrows point to tops. Next week will be week #5 in the current cycle.

This chart answers the question: Which trend is stronger, gold or crude oil? Since August gold has clearly outperformed.

Featured is GDX the miners ETF. Price has confirmed the upside breakout at the blue arrow. The first target is at the green arrow. The expectation is for the formation of an ARAT pattern. The SIs are positive and the MAs are in positive alignment and rising.

This chart answers the question which trend is stronger, mining stocks or oil stocks. Miners have outperformed since July.

=== >>> MODEL PORTFOLIO

Each report will show the trades that were completed since the last report.

Since I do most of my trading on the TSX, I will show the stock symbol for the US equivalent in brackets. Note: when trading a pink sheet listed stock, you should always buy or sell using a specific price - never a 'market' order.

To benefit from this feature, pull up a chart for any of the symbols that I buy or sell. Determine if you want to do likewise or wait for another opportunity. If you're not sure of the fundamentals, - click on the website link provided. Always make sure the index or ETF that represents the sector is in harmony with your trade. I apologize for the short time I stay in some stocks, but this is all based on chart patterns. If the chart pattern changes from positive to negative - I usually run. Here are some of my trading habits:

- **I eliminate all emotion.** Stocks are simply investments that I use to improve the bottom line. I pick a stock or commodity because I think the chart pattern looks positive. Once I decide that we are operating in a bull market, I don't bother with sell stops - I patiently wait for the stock

or ETF to come back into positive territory.

- **When I do sell below my cost, I look at the loss as an opportunity to get into a winner.**
- I use the 20 day and 30 day exponential moving averages at Stockcharts.com to help me decide when to buy and when to sell. Then I draw a channel, just as I do in the reports I issue. As long as the stock stays in the channel, I'll keep it as part of the portfolio, unless I decide to take profits.
- You've heard people say: 'Buy Low – Sell High'. Here is a variation on that advice: **BUY HIGH – SELL HIGHER!** It has been my experience that buying stocks that have just broken out to a new 5 year high have been the best performers in my portfolio. When a stock or commodity has reached this stage, there is 'blue sky' ahead.
- Next I look at the supporting indicators – especially the Accumulation/ Distribution line. When a stock or commodity becomes overbought (such as trading near the top of the channel, or making a 'double or triple' top), I usually sell all or part of my holding into the rally. . Over time I try to replace these stocks during pullbacks.
- Finally I make sure that the sector in which the stock or commodity operates, is moving in the same direction as the stock of commodity that I am about to buy.

Here are some kernels of wisdom from a very successful trader, Jesse Stine:

- Emotional intelligence is of utmost importance.
- Discipline is key
- Drawdowns are lessons.
- Patience is very important
- Ignore the news media
- Have faith in your system
- Trade with confidence
- Never get attached to a stock
- Be a contrarian
- Be a lone wolf.

According to an article titled: The Strange Behavior of Gold Investors, by Dimitri Speck (link is here): <https://www.gold-eagle.com/article/strange-behavior-gold-investors-monday-thursday>

Monday is a day when investors usually sell gold early.

Transactions within the Model Portfolio are shown as they occur, in the daily report. So far during the past 12 months we closed out 199 positions. 195 at a profit and 4 at a loss. This produces a ratio of +97% The reason why our portfolio is large is due to our desire to be of help to as many investors as possible, by blazing a trail, and 'trading with our supporters'.

Our position in 'penny stocks' is always very conservative, but growing, as the % increase in a penny stock with proven assets in a safe location usually beats a senior producer 'hands down'.

21 positions are 'under water'.

The Model **Portfolio consists of 75% precious metals, 21% in various other categories and 4% cash.**

This chart courtesy Jesse Colombo shows the expected upcoming upside breakout in silver. Colombo picks a target for this breakout at \$72. My target for this breakout is 64.00. Eventually Jesse will be right.

Featured is the silver chart. Price is breaking out at the blue arrow. Once it is confirmed at the green arrow the next rally will be underway. The number of ounces backing SLV is 500.9 million, compared to 490.1 million last week.

Featured is SIL the silver producers ETF. Price has confirmed a breakout at the blue arrow. The first target is at the green arrow. The SIs are positive and the MAs are in positive alignment and rising. The brown arrow points to rising volume, this despite it being a holiday week.

Featured is the US dollar index. Price is carving out a triangle. A rise above the blue arrow sets up a target at 103. A drop below the brown arrow will test support at 97.

Featured is the CRB index. Price is coiling inside a large triangle and the expectation is for a breakout at the blue arrow.

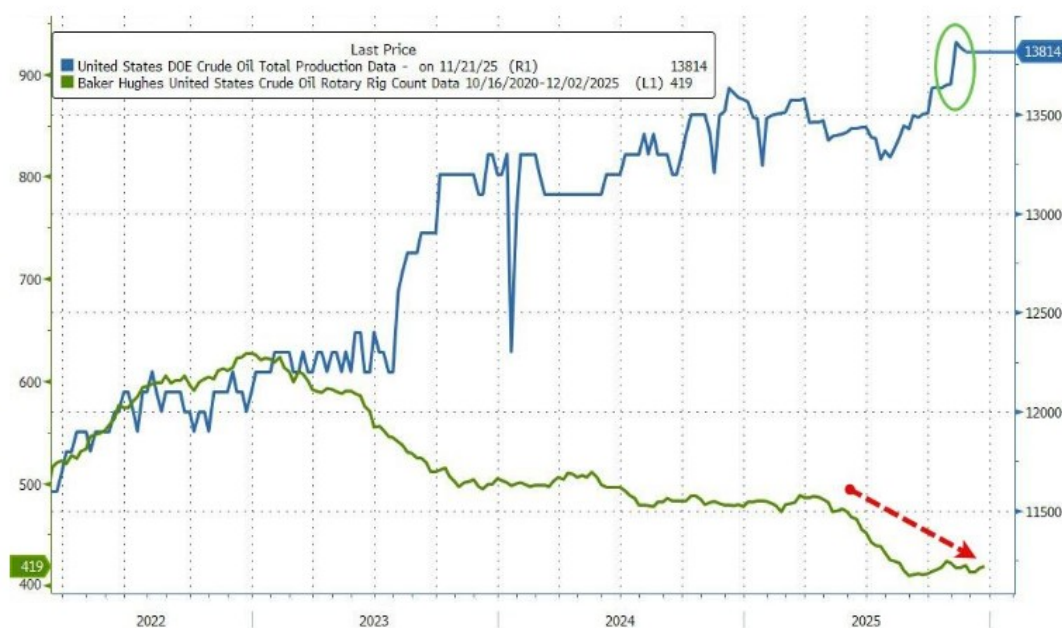

Featured is URNM a Uranium ETF. Price is rising in the blue channel at a rate of +100% per year. A close above the blue arrow will mark the start of a new rally. The SIs are ready to turn positive and the MAs are in positive alignment.

Featured is COPX a copper ETF. Price is rising inside the blue channel at a rate of 114% since April. Once confirmed at the green arrow the breakout will mark the start of new rally. The SIs and MAs are positive.

US Crude production continues to hover near record highs...

Source: Bloomberg

This chart courtesy Bloomberg shows UA crude oil production continues to increase, despite a reduction in the rig count. Most of the oil appears to be coming from existing wells.

This chart courtesy Factset shows the Capex estimates for the stock market which are now rising exponentially.

The Fear of Death

... without hope and without God in the world.

— Ephesians 2:12

Millions of people have studied Edgar Allan Poe's most famous poem, "The Raven," and yet I (Dr. D. James Kennedy), doubt that one-half of one percent of them have the faintest idea what it means.

"The Raven" is the personification of the unbelief that plagued Poe's life. He was terrified by the grisly specter of death. In this poem he is seeking to find some surcease of sorrow for his lost Lenore. As he lost his wife in real life, so in this poem he loses Lenore, a beautiful, radiant maiden who has been snatched from his arms.

He can find no relief for the suffering and the heartache that grips him. He wants what everyone wants: some ease to the pain of this life. He wants to know that there is a balm in Gilead—a biblical phrase for Jesus Christ. In other words, Poe is asking, "Will I see Lenore again?" And unbelief answers, "Nevermore."

How different is Christ's answer to this question. On that glorious Easter morn He rose again from the dead and stepped forth into the light saying, "*I am He who lives, though I was dead. Look! I am alive forevermore.*" (Revelation 1:18).

Unbelief says: "Nevermore." Faith says: "Forevermore." He conquered our fears and fulfills our hopes now and forevermore.
